

Color College Workshop Supply List

(Class Participants are asked to bring their lunch. The class runs from 9am-4pm)

Supply List

To complete the quilt, you will need:

1. Basic sewing supplies, rotary cutter, favorite ruler, mat and color pencils or crayons in basic colors for designing your blocks.
2. 2 - 3 yards Main fabric for blocks, accent squares and binding. (In my photo, the Main color is red. Students may choose any color.)
3. 1 1/2 yards background color (black, white or neutral grey). You will need 2 1/2" strips for piecing and 3" strips for 1/2 square triangles.
4. 2 1/2" scrappy color squares to create your color combinations. For beginning color students, I suggest staying with basic Crayola colors: red, blue, yellow, green, purple and orange. Remember to include light and dark shades of the basic colors, especially light and dark to match your Main color.
5. 24 sash strips, 2 1/2" x 10 1/2" of your background color (black, white or neutral). **These do not need to be pre-cut.**
6. 16 sash accent squares 2 1/2" x 2 1/2" of your Main color. **These do not need to be pre-cut.**
7. Background fabric for outer border: 4 strips 4 1/2" x 45" (black, white or neutral). **These do not need to be pre-cut.**

Note: Pre-cutting 3" strips (or squares) and 2 1/2" strips (or squares) of the background fabric before class helps speed things up — just a suggestion. We'll begin the day with the PowerPoint "Color Collage" lecture and trunk show. Following the lecture, students may piece one block, so everyone understands how to put the block together. It helps students move along a little bit more quickly if they have a few 3" and 2 1/2" shares cut before class. The goal is to have the first block cut and kitted (or pieced) before lunch. If every student is comfortable stitching half-square triangles, it's not necessary to bring a machine to class, as we won't need to stitch the first block.

After lunch, the goal is to cut and designate remaining 8 blocks. I will provide a coloring page and small sandwich bags. As each block is designed, you will transfer your design to your coloring page (or take a photo of your book) and seal your block pieces into a sandwich bag to be stitched later. You will go home with at least one completed block, and have the rest of your quilt designed and ready to stitch as a ready-made pre-cut kit.
